

Solenoid-operated, rapid advance and feed flow control with reverse flow check

**CAPACITY: 60 gpm** 

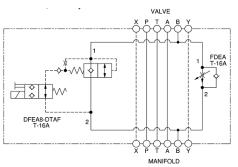

This assembly consists of a fully-adjustable, pressure-compensated flow control with reverse-flow check which provides precise flow regulation for meter-in or meter-out applications where there may be wide pressure fluctuations. It is infinitely adjustable from nearly closed up to the maximum flow. An integral high-capacity check valve provides unrestricted flow in the reverse direction. The rapid or feed rate is selected by a solenoid operated (normally open or closed) 2-way, 2-position valve.

# DFEAS-DTAF 2 MANIFOLD MANIFOLD

Meter In B Normally Closed

Meter In B Normally Open

# **TECHNICAL DATA** NOTE: DATA MAY VARY BY CONFIGURATION. SEE CONFIGURATION SECTION.

Body Type	Sandwich
Interface	ISO 07
Capacity	60 gpm
Body Features	Meter in B
Control Flow Range	0 - 25 gpm
Seal Plate Included (see notes)	Yes
Stack Height	3.52 in.

### **NOTES:** • Stack height value in technical data table includes seal retainer plate.

- For detailed information regarding the cartridges contained in this assembly, click on the models codes shown in the Included Components tab.
- Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.

## **INCLUDED COMPONENTS**

Part	Description	Quantity	
500-001-111*	O-Ring	2	
500-001-118*	O-Ring	4	
700-006*	Seal Plate	1	
811-001-006*	Pin	2	
DFEA8DN	Cartridge	1	
DTAFMHN	Cartridge	1	
FDEALAN	Cartridge - Primary	1	

# **TECHNICAL FEATURES**

- The sharp-edged orifice design minimizes flow variations due to viscosity changes.
- A balanced adjustment mechanism allows for easy adjustment even at high pressures.
- Now available with FLeX Series solenoid valves. See CONFIGURATION section, SOLENOID DESIGNATION to specify.
