## **CONFIGURATION**

## NQ/TESSer

- This installation requires a retainer and seal kit which are purchased separately. See "Related Accessories" section.
- *Important:* Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
